

Measuring Consumer Experience 2023

In 2022, **4,451** South Australians were interviewed, and their responses were analysed to measure hospital performance. Surveys were undertaken between January to December 2022.

Views and concerns listened to

82%

of patients felt their views and concerns were listened to always or mostly.

Individual needs met

ALMOST **85%**

of patients felt their individual needs were met almost or most of the time.

Felt cared for by staff

OVER **87%**

of patients felt mostly or always cared for.

Involved in making decisions

OVER **83%**

of patients felt they were involved in decision making.

Being kept informed

OVER **82%**

felt they were kept informed as much as they wanted about their care and treatment.

Staff communicated with each other

ALMOST **84%**

could tell staff involved in their care communicated with each other.

Pain relief met needs

OVER **89%**

of patients received pain relief that met their needs.

Felt confident in safety

OVER **89%**

felt confident in the safety of their treatment.

Overall quality

OVER **86%**

felt the overall quality of care received was good or very good.

Recommend hospital

ALMOST **91%**

of patients would recommend their hospital to a relative or friend.

Questions are based on the Australian Hospital Patient Experience Question Set (AHPEQS).

The SA Health benchmark of 85% was met in five out of ten categories, the remaining five were within 3% of the benchmark.
