Troponin for ED - in lab to validated time <50 minutes	
Identifying and definitional attributes	
Short Name:	Troponin for ED: in lab to validated time
Tier:	Tier 1
KPI ID:	AF-PA-T1-1
Description:	Percentage (%) of troponin results meeting turnaround times from in lab to validated
Computation:	Count (#) of troponin validated report results for ED with a turnaround time (in lab to validated time) less than 50 minutes divided by number of requests from ED for troponin results received by the laboratory. Represented as a percentage.
Numerator:	Count (#) of troponin validated report results for ED with a turnaround time (in lab to validated time) less than 50 minutes.
Denominator:	Number of requests from ED for troponin results received by the laboratory

<b>Frequency of Reporting:</b>	Monthly (i.e., July Data Reported in August)
<b>Notes:</b>	The reference period is a rolling 12-month, i.e., the current month combined with the previous 11 months (for a total of 12 months). The rationale for this is the National Invasive Breast Cancer standards are based on the final outcome following surgical and histopathological review. This process may take upwards of 12-months. Instances where quarterly data is reported, a rolling 12 month point in time is utilised i.e., September for a given year is reported as Quarter 1.
