Red Cell Allo-Immunisation

The *Red Cell Allo-Immunisation* Perinatal Practice Guideline (PPG) version 1 has been rescinded.

This PPG is currently being updated.

Identifying Women at Increased Risk and Testing Information

Please refer to the Royal College of Obstetricians and Gynaecologists (RCOG) Green Top guideline 65: The Management of women with red cell antibodies during pregnancy (May 2014), reviewed and endorsed by the Royal Australian and New Zealand College of Obstetricians and Gynaecologist (RANZCOG) in 2022, for information and guidance on the following:

- ➢ Background and epidemiology
- ➢ Identification and assessment
- ➢ Pregnancy counselling
- ➢ Red cell antibodies in pregnancy
- ➢ Testing and management

Referral

Consultations and appointments for clinical review of women with red-cell antibodies titre ≥ 1:16 or previously affected fetus/neonate should be referred to **Maternal Fetal Medicine Unit** using the referral form found in the link below:

https://www.wch.sa.gov.au/patients-visitors/women/pregnancy-services/maternal-fetal-medicine-service
