*Caring for women from ocean to outback*

## Do you know about free breast cancer screening?

If you're a woman aged 50 to 74 years, you're eligible to have a free breast screen (screening mammogram) with BreastScreen SA.

A screening mammogram is currently the only clinically proven way to detect breast cancer early, before symptoms start to show.

Breast cancer survival rates are improving each year, but the key is early detection. This is why it's so important to have a breast screen every two years.

Make your health a priority – an appointment can take as little as 10 minutes, and our female specialist radiographers will ensure this experience is as comfortable as possible.

**To book an appointment or to find out more, call us on 13 20 50.**
