

Antimicrobial Utilisation Surveillance in Australian Hospitals

Victoria – Statewide antimicrobial benchmarking report for acute inpatient aggregate usage rates

January 2023 – June 2023

Antibacterial utilisation rates provided in this report are calculated using the number of defined daily doses (DDDs) of the antibacterial class consumed each month per 1,000 occupied bed days.

Contributing hospitals are assigned to Australian Institute for Health and Welfare (AIHW) defined peer groups.¹ Contributing hospitals can find their de-identifying code via the NAUSP Portal 'Maintain My Hospital' drop-down menu.

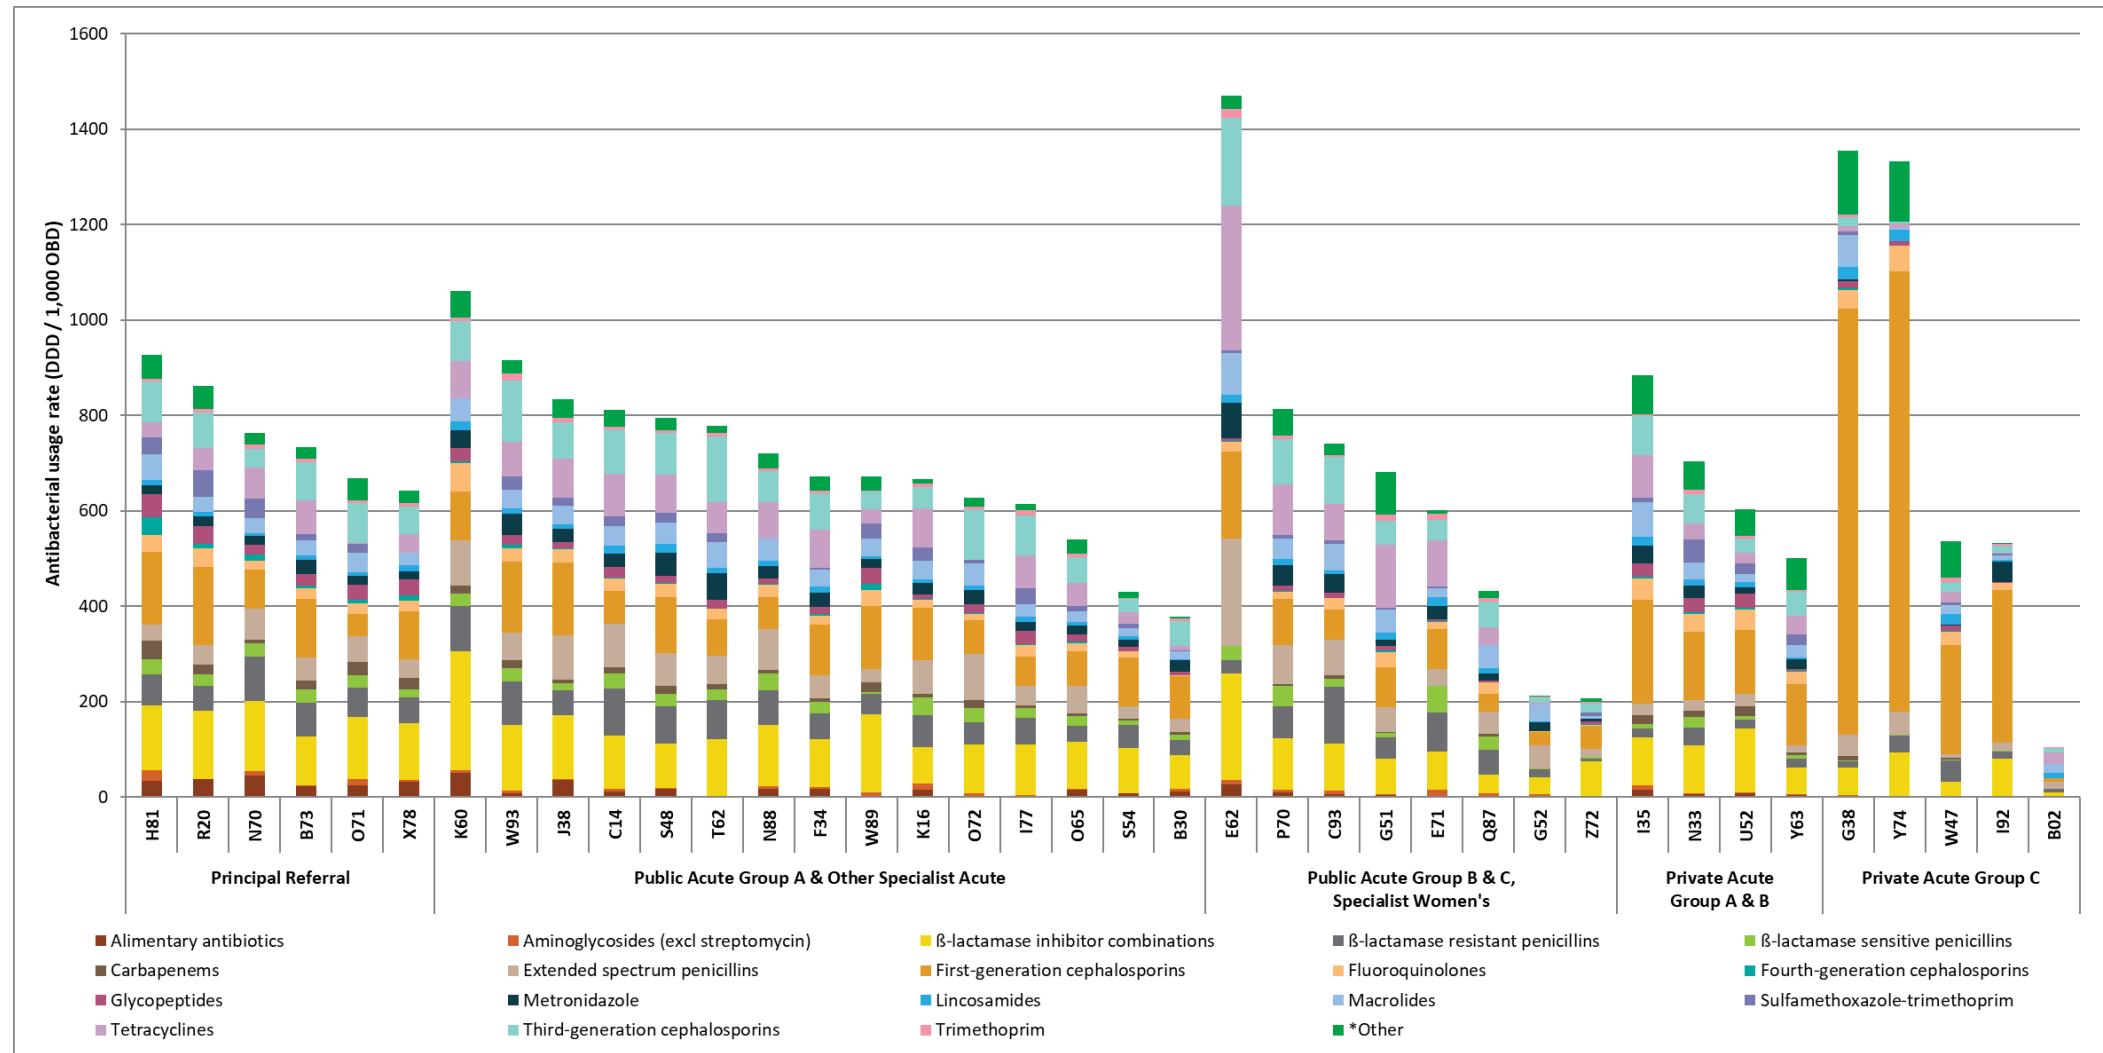

DDD values for each antimicrobial are assigned by the World Health Organization based on the "assumed average maintenance dose per day for the main indication in adults". DDDs are reviewed annually by the WHO as dosing recommendations change over time. For more information refer to:

https://www.whocc.no/atc_ddd_methodology/purpose_of_the_atc_ddd_system/.

The chart below presents the acute aggregated antibacterial usage rates for the 38 respective contributing hospitals over the six-month period from 1 January 2023 to 30 June 2023. Unless otherwise specified, the aggregate rates include all acute care areas of the hospital, excluding usage in the emergency department and the operating theatre.

¹ AIHW. *Hospital resources 2017-18: Australian hospital statistics*. Available from <https://www.aihw.gov.au/reports/hospitals/hospital-resources-2017-18-ahs/data>

Chart 1: Total acute hospital antibacterial usage rates (DDD/1000 OBD) in NAUSP contributor hospitals, by peer group, Victoria, January-June 2023 (excludes Emergency Department and Operating Theatre)

Alimentary antibiotics = rifaximin, fidaxomicin. *Other = amphenicols, antimycotics, combinations for eradication of *Helicobacter pylori*, monobactams, nitrofurans, linezolid, daptomycin, other cephalosporins, polymyxins, rifamycins, second-generation cephalosporins, steroids, streptogramins and streptomycin.

This report includes data from the following 38 hospitals in Victoria:

Albury Wodonga - Albury	Monash Medical Centre Clayton
Albury Wodonga - Wodonga	Monash Moorabbin Hospital
Alfred Hospital	Peter MacCallum Cancer Centre
Angliss Hospital	Rosebud Hospital
Austin Hospital	Royal Melbourne Hospital
Ballarat Base Hospital	Sandringham Hospital
Bendigo Health	South Eastern Private Hospital
Box Hill Hospital	St John Of God Geelong
Cabrini Hospital Brighton	St Vincent's Hospital Melbourne
Cabrini Hospital Malvern	St Vincent's Private East Melbourne
Casey Hospital	St Vincent's Private Fitzroy
Central Gippsland Health	St Vincent's Private Hospital Kew
Dandenong Hospital	St Vincent's Private Hospital Werribee
Frankston Hospital	Swan Hill District Health
Geelong Hospital	The Northern Hospital
Grampians Health - Horsham	Warrnambool Base Hospital
Holmesglen Private Hospital	Werribee Mercy Hospital
Maroondah Hospital	Western Health Footscray
Mercy Women's Hospital	Western Health Sunshine

ANTIBACTERIAL CLASSES			
Alimentary antibiotics	fidaxomicin paromomycin rifaximin	Lincosamides	clindamycin lincomycin
Aminoglycosides	amikacin gentamycin neomycin tobramycin	Macrolides	azithromycin clarithromycin erythromycin roxithromycin spiramycin
β-lactamase inhibitor combinations	amoxicillin - clavulanate piperacillin - tazobactam	Monobactams	aztreonam
β-lactamase resistant penicillins	dicloxacillin flucloxacillin	Nitrofuran derivatives	nitrofurantoin
β-lactamase sensitive penicillins	benzathine benzylpenicillin benzylpenicillin phenoxyethylpenicillin procaine benzylpenicillin	Polymyxins	colistin polymyxin B
	doripenem	Second-generation cephalosporins	cefaclor cefamandole cefotetan cefoxitin cefuroxime
Carbapenems	ertapenem imipenem - cilastatin meropenem meropenem - vaborbactam	Steroid antibacterials Streptogramins Streptomycins Sulfonamide-trimethoprim combinations	fusidic acid pristinamycin streptomycin sulfamethoxazole - trimethoprim
Extended-spectrum penicillins	amoxicillin ampicillin pivmecillinam temocillin	Tetracyclines	doxycycline minocycline tetracycline tigecycline
First-generation cephalosporins	cefalexin cefalotin cefazolin	Third-generation cephalosporins	cefixime cefotaxime ceftazidime ceftazidime - avibactam ceftriaxone
Fluoroquinolones	ciprofloxacin levofloxacin moxifloxacin norfloxacin	Trimethoprim	trimethoprim
Fourth-generation cephalosporins	cefpime cefprirome	Other (including other cephalosporins and penems)	ceftaroline fosamil ceftolozane - tazobactam daptomycin faropenem fosfomycin linezolid rifampicin tedizolid
Glycopeptides	dalbavancin oritavancin teicoplanin vancomycin		
Imidazole derivatives	metronidazole		
Intermediate-acting sulfonamides	sulfadiazine
