SA Health

Safety and Quality

2017-2019 Work Plan
Part 1: Introduction

This three year rolling work plan identifies the priorities for SA Health to improve the safety and quality of care provided to consumers across SA Health organisations. SA Health is committed to providing a safe, high quality, accessible health care system for all South Australians. Divisions of the Department for Health and Ageing (DHA), the Safety and Quality Unit (S&Q) and Local Health Networks (LHNs) will all play a critical role in achieving this, through working in partnership with health services, staff, consumers and the community.

The DHA Safety and Quality Unit provides advice, education, support, policy, leadership and advocacy, administering legislation and partners with service providers, government agencies and the non-government sector to identify and respond to current and emerging public health and clinical issues.

The DHA Safety and Quality Unit have identified six key priority areas for development and implementation between 2017 and 2019 as outlined below. These priorities are based on evidence of the greatest benefit for consumers, and focus on saving lives and reducing incidents. They are designed to address patient safety priorities that have been identified at both a national and state level and continue to support SA Health to be responsive to any new emerging issues or risks.

Safety and Quality Priority Areas

Priority Area 1  Patient safety
Priority Area 2  Partnering with patients, consumers and community
Priority Area 3  Quality cost and value
Priority Area 4  Supporting health professionals to provide safe and high quality care
Priority Area 5  Safety Learning System (SLS)
Priority Area 6  Communication strategy to support safety and quality
Context

The Australian Commission on Safety and Quality in Health Care

The Australian Commission on Safety and Quality in Health Care (ACSQHC) was established in 2006 to lead and coordinate safety and quality improvements nationally. Since its establishment a key output of the Commission has been the National Safety and Quality Health Service (NSQHS) Standards which have guided the implementation of safety and quality systems to improve the quality of health care across Australia. SA Health priorities are informed by, and aligned to, the ACSQHC Workplan.

SA Health Strategic Directions 2016-2018

SA Health is committed to improving the health of all South Australians by providing leadership in health reform, public health services, health and medical research, policy development and planning, with an increased focus on wellbeing, illness prevention, early intervention and quality care. The following key directions identify SA Health will achieve this by:

> setting the policy and strategic framework for action on important health and wellbeing issues
> placing a strong emphasis on prevention and wellbeing
> promoting quality and safety so every South Australian can have confidence in the care they receive
> taking responsibility for the priorities posed by the government of the day
> promoting and providing good corporate governance and business practices within the Department and within agencies who work with our community
> working in collaboration with other parts of our network
> commissioning the health and wellbeing services our community needs.

Premier's Strategic Priorities for South Australia

The State Government has developed seven priorities for South Australia's future. These priorities are areas where we can make the most difference to the lives of everyday working people and the most difference to the future prosperity of our State.

SA Health contributes to five of the Premier's seven Strategic Priorities

> Every Chance for Every Child
> Safe Communities Healthy Neighbourhoods
> Creating a Vibrant City
> Premium Food and Wine from Our Clean Environment
> An Affordable Place to Live

Transforming Health

The foundation of the Transforming Health agenda is the pursuit of high quality care and to deliver the best care, first time, every time, to all South Australians. Transforming Health aims to address a whole of system change and is the new way of providing quality healthcare in South Australia.
Part 2: Safety and Quality Priorities

Priority Area 1  Patient safety
SA Health is committed to improving the safety and quality of patient care and achieving the best patient outcomes possible. The Safety and Quality Programs are aligned to the Australian Safety and Quality Framework for Health Care and the National Safety and Quality Health Service Standards, and intend to support SA Health to meet accreditation requirements, improve quality of care and reduce harm to consumers.

The Australian Safety and Quality Framework for Health Care describes a vision for safe and high-quality care for all Australians and sets out the actions needed to achieve this vision. There are three core principles for safe and high-quality care. These are care that is:

> consumer centred
> driven by information
> organised for safety.

Priority Area 2  Partnering with patients, consumers and community
SA Health values the contribution consumers and the community can make in improving health services, including service planning, designing care and service measuring and evaluation and are committed to strong consumer and community engagement.

National Safety and Quality Health Service Standard 2: Partnering with Consumers requires the involvement of consumers in the organisation and strategic processes that guide the planning, design and evaluation of health services.

Priority Area 3  Quality, cost and value
This priority area supports the state governments commitment to Transforming Health and to deliver a quality healthcare system that provides best care, first time, every time. The six quality principles underpinning Transforming Health include a health system that is:

1. Patient centred
2. Safe
3. Effective
4. Accessible
5. Efficient, and

The aim of this priority area is to have a health system that provides the right care, minimises waste and optimises value and productivity. A number of approaches are used including;

1. Mapping healthcare variation using the Atlas of Variation
2. Examining if variations are warranted and developing strategies to address variations such as new approaches of care, clinical care standards and patient decision aids.
Priority Area 4  Supporting health professionals to provide safe and high quality care

Health practitioners and others providing health care require skills and knowledge appropriate to the areas in which they work and the consumers they are providing care for. Skills and knowledge should be based on best practice. The key focus areas for ensuring this is achieved are:

1. The development of clinical metrics to support safety and quality improvement
2. Local monitoring of patient safety
3. Reviewing, analysing and monitoring hospital acquired complications (HACS)

Priority Area 5  Safety Learning System

The SLS supports all SA Health services to report, manage, investigate and analyse patient incidents, and consumer feedback. It is also used for capturing information about security services and to record formal notifications such as those for coronial matters or medical malpractice.

Priority Area 6  Communication strategy to support safety and quality

The SA Health Media and Communications Branch work closely with Safety and Quality to support their priority areas. Media and Communications provide advice, develop and implement communications strategies to ensure that consistent messaging reaches the desired target audiences internally to all LHN and Health Service staff, and also externally to the SA public and/or stakeholder groups eg Private and Aged Care facilities, Registered Training Organisations, Unions, Consumer and Community Advisory Groups, Consumer and Community Organisations, other jurisdictions and territories.
### Part 3: Workplan

#### Priority Area 1  Patient safety

| 2. Review the governance of SLS to improve:  
  > Accountable systems of consultation and approval of changes and enhancements, and data requests inc FOI  
  > Authorisations of SLS administrators, Incident managers and executive level staff (eg for Notifications module) | Late 2017 | Safety and Quality SLS team and Safety and Quality Operational Committee |
| 3. Develop and implement SLS modules such as:  
  > New risk register  
  > Others as required, eg complaints against a health practitioner | Late 2017 | Safety and Quality and Risk Local Health Networks |
| 4. Review:  
  > Location tree, especially for new RAH  
  > Basic modules – actions and contacts, notifications  
  > Consumer feedback module  
  > Security module  
  > WHS module | Mid 2017 Ongoing 2017 Late 2017 2018 | Safety and Quality SLS team and Safety and Quality Operational Committee |
| 5. Review incident classification to enhance reporting and SLS data to meet requirements for national reporting, and support clinical quality improvement | 2016-18 | Safety and Quality SLS team and Safety and Quality Operational Committee Specialty areas/content experts |
| 6. Upgrade server and version of software. Provide information to users about changes / enhancements as a result. | Late 2017 | Safety and Quality and ICT, SLS Admins for testing |
| 7. Develop, implement and publish resource materials, Notices, webpages, training materials eg Guides, Topic guides face to face and web-based resources, as required. | Ongoing | Safety and Quality and Communication |
| 8. Interrogate SLS data and review opportunities, improvements and lessons learned to share across SA Health. | Ongoing | Safety and Quality and Communication |
| 9. Enable remote notification of incidents by SAAS and other applicable services | 2017-18 | Safety and Quality and SA Ambulance Service with ICT |
## Priority Area 6  Communication strategy to support safety and quality

<table>
<thead>
<tr>
<th>Activity</th>
<th>Time frame</th>
<th>Responsible</th>
<th>SA Health Objective</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Develop an overarching Safety and Quality Communications and Media Plan for 2016-17.</td>
<td>Ongoing</td>
<td>Communications</td>
<td>SA Health Priority Program</td>
</tr>
<tr>
<td>2. Continue to develop and promote appropriate Safety and Quality social media content in line with the renewed Department for Health social media strategy which incorporates a strong focus on more timely and engaging content (infographics, photos, consumer stories etc.).</td>
<td>Ongoing</td>
<td>Communications</td>
<td>SA Health Priority Program</td>
</tr>
<tr>
<td>3. Continue to develop and update individual program communications plans as required (eg Patient Incident Management and Open Disclosure Policy, Resuscitation Planning- 7 Step Pathway Policy).</td>
<td>Ongoing</td>
<td>Communications and Local Health Networks</td>
<td>SA Health Priority Program</td>
</tr>
<tr>
<td>4. Continue to provide regular communication updates to LHN, Health Service and Ageing Communications and Media Managers.</td>
<td>Ongoing</td>
<td>Communications</td>
<td>SA Health Priority Program</td>
</tr>
<tr>
<td>5. Develop and implement an external facing advertising campaign for Challenging Behaviour phase 2: Emergency Departments.</td>
<td>Complete</td>
<td>Communications</td>
<td>SA Health Priority Program</td>
</tr>
<tr>
<td>6. Complete an evaluation of the external advertising campaign for Challenging Behaviour phase 1: SAAS inclusive of survey findings and communicate back results back to staff.</td>
<td>Ongoing</td>
<td>Communications</td>
<td>SA Health Priority Program</td>
</tr>
<tr>
<td>7. Produce/circulate regular newsletter articles, infographics, promotional internet/intranet panels for LHNs and Health Services sites to support accreditation (eg pre April Falls Awareness Month, Global Hand Hygiene Day- provide a suite to LHN communications managers ahead of time to embed in local mediums).</td>
<td>Ongoing</td>
<td>Communications and Local Health Networks</td>
<td>SA Health Priority Program</td>
</tr>
<tr>
<td>8. Continue regular communications promoting the 20 live Safety and Quality eLearning courses to all SA Health staff, including promotion of new courses as they go live, driving increased completion rates.</td>
<td>Ongoing</td>
<td>Communications and Local Health Networks</td>
<td>SA Health Priority Programs</td>
</tr>
<tr>
<td>9. Develop and implement a communications plan and external advertising campaign for Patient, Family Escalation of Care.</td>
<td>Ongoing</td>
<td>Communications</td>
<td>SA Health Priority Program</td>
</tr>
<tr>
<td>10. Develop and implement a communications plan and external advertising campaign for Partnering with Carers.</td>
<td>Ongoing</td>
<td>Communications</td>
<td>SA Health Priority Program</td>
