## Workshop: Developing a Survey

#### AIM:

- To introduce the theory and practice of developing a survey;
- To provide an overview of key concepts survey methodology; and
- To showcase practical tips in developing scientifically sound and practically useful surveys.

#### OBJECTIVE:

Surveys are a dime-a dozen. If in doubt, let's do a survey seems to be a common mantra. But what makes a rigorous and practically useful survey that will provide relevant data? This training series will provide AHP's with the knowledge and skills to frame a scientifically sound and practically useful survey.

#### CONTENT:

Theoretical and practical issues to consider when developing and using a survey; What makes a good survey? What are common issues to avoid when developing and using a survey.

#### FORMAT:

Online via zoom, combination of didactic presentation, individual activity, and reflection/feedback to the wider group. The sessions will be recorded and sent out to all those who have registered upon conclusion.

Link will be provided following registration.
