Mental Health Nursing

Healthy career opportunities exist in health
Mental Health Nursing

Careers in Mental Health Nursing involve working with consumers, carers and the community to maximise mental health.

Mental Health Nurses utilise specialist nursing skills in the assessment and management of mental illness; and apply these skills in a variety of roles and settings including:

- adult services: acute inpatient and community
- adult rehabilitation services: inpatient and community
- child and adolescent mental health
- crisis intervention and triage services
- drug and alcohol services
- emergency departments
- forensic mental health
- general practice
- health promotion
- intermediate care services
- older persons mental health services
- policy, research and teaching roles

Working with people experiencing mental ill health is a rewarding and dynamic nursing career pathway.

Becoming a Mental Health Nurse in South Australia requires a Graduate Diploma in Mental Health Nursing.
