

South Australian

# *Health Industry Mission Statement*

As health providers we are committed to supporting good health and maintaining the highest quality health system for all South Australians. Key to achieving this will be a collaborative effort between the public and private health care sectors.

Representing the health industry through advocacy and constructive interaction and linkage with government, industry, academia and other private profit and not-for-profit organisations, our commitment is to:

- > harness opportunities to collaborate, keeping foremost the primary objective of providing high quality, accessible health services to all South Australians
- > build and strengthen relationships within the health industry, embracing the multidisciplinary nature of services required
- > engage and work with the broad cross section of health service providers to enact achievable change
- > identify practical, appropriate and effective health care strategies and initiatives to achieve improved health outcomes for all South Australians.
