Head lice live on human heads, NOT on animals, carpets or furniture.

Head lice DO NOT fly, jump, hop or swim – they spread from head to head contact.

They love ALL hair colour and ALL hair types including fine, thick, curly, straight, clean AND dirty.

Adults are called lice, their eggs are called nits. Lice can live for up to 5 WEEKS!

A single treatment for head lice will NOT kill ALL nits (eggs).

The wet combing method is an EFFECTIVE treatment.

Head lice DO NOT prefer a particular blood group.

Head lice DON'T carry disease, but scratching the scalp can cause bacterial infections if the skin breaks.

You can get head lice again! Successful treatment does NOT stop head lice from coming back later.
