Eat a Rainbow bingo game

For 2 - 6 players

Instructions:

1. Each player takes a bingo board.

2. Shuffle the cards and place in a stack face down (rainbow symbol on top).

3. The dealer turns over the top card in the pack. The player with the matching picture on their bingo board takes the card and places it on top of the picture on their game board. This player then turns over the next card in the pack, and whoever has the matching picture on their bingo board then takes the card, places it on their board and turns the next card.

4. Continue turning over cards from the stack and placing them on the bingo boards, until one player has all their squares matched. That player is the winner.
Bingo game

Card and Board template instructions

Bingo cards

1. If you have the facility, print the images onto card or thick paper. Print one set of each colour page of images back to back with the page of 6 Eat a Rainbow graphics. Each sheet of fruit and vegetable images should have six images of the Eat a Rainbow graphic on the reverse side.

2. Laminate each sheet.

3. Cut each sheet along the dotted-line borders to make 36 squares. These make up the Bingo playing cards.

Bingo boards

1. If you have the facility, print the pages onto card or thick paper. Print the six different pages of fruit and vegetable images back to back with the page with the single large Eat a Rainbow graphic.

2. Laminate each sheet.

3. These make up the Bingo playing boards.

If you can’t print double-sided, you might want to print single sided sheets, and paste the sheets with the Rainbow graphics to the back of the images sheets, before laminating.
