

Neuromuscular, Neurogenetics & Peripheral Neuropathy Clinics

RAH Campus

Phone: 1300 153 853

Fax: (08) 7074 6247

Neuromuscular Clinic

- **Dr Janakan Ravindran**
(Wed am)
- **Dr Christopher Kneebone** (Wed am)
- **Dr Deborah Field**
(Wed am)
- **Dr Roula Ghaoui**
(Wed am)
- **Neuromuscular Fellow**
(Wed am)
- **Neurology Registrar**
(Wed am)

Neurogenetics Clinic

- **Dr Roula Ghaoui**
(Wed am)

Complex Peripheral Neuropathy Clinic

- **Dr Jessica Hafner**
(Monthly Wed am)

Referral Criteria

Appropriate referrals include patients with:

1. Suspected acquired primary muscle diseases (e.g. myopathy, myositis)
2. Suspected late-onset hereditary nerve and muscle diseases
3. Disabling, progressive or 'red flag' peripheral neuropathy (subacute, motor predominant, non-length-dependent, associated systemic symptoms, or associated autonomic dysfunction)
4. Confirmed acquired or hereditary muscle disorder with ongoing surveillance/medical management issues
5. Confirmed acquired or hereditary neuropathy requiring treatment and/or ongoing surveillance/medical management

Conditions which are **not** assessed by Neuromuscular, Neurogenetics and Peripheral Neuropathy Clinics include:

1. Myopathy in setting of other severe systemic illness known to cause myopathy (e.g. severe hypothyroidism)
2. Confirmed hereditary peripheral neuropathy with no ongoing medical management/surveillance issues (e.g. genetically confirmed Charcot-Marie-Tooth disease) (consider referral to [Rehabilitation Services](#))
3. Peripheral neuropathy not fulfilling the above criteria (consider referral to [General Neurology Clinic](#), if specialist input required)
